

Public Health Preparedness and Response

DLH supports all phases of public health emergencies and response through proven program management, precise technical support, clear communication, and data-driven scientific leadership.

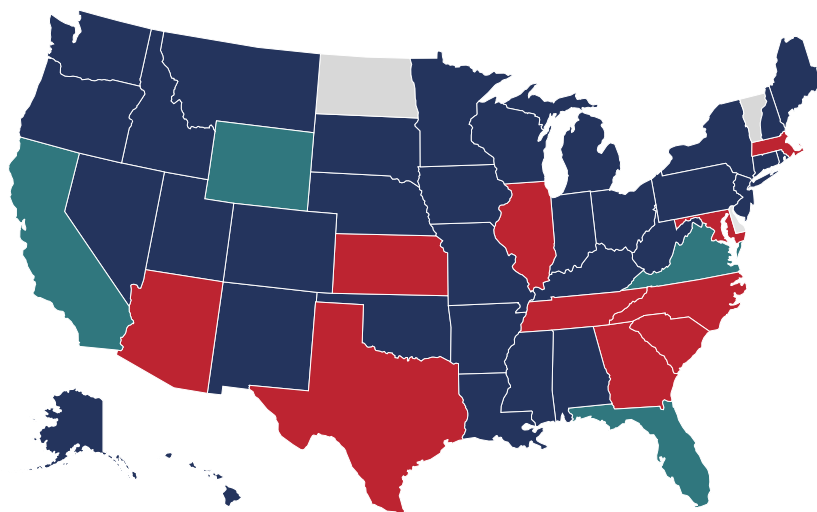

In response to current and emerging global and national events, DLH stands ready to support Federal agencies in their public health preparedness and response efforts. Our team understands and is experienced in the four stages of disaster recovery: Mitigation, Preparedness, Response, and Recovery.

WHO WE ARE

DLH has over 50 years' experience supporting large scale solutions and services for Federal health and human services initiatives. DLH provides professional health services to Federal Government agencies including the U.S. Departments of Health and Human Services, Veterans Affairs, and Defense.
