Key Customers

What is an eMicro-Simulation?

eMicro-Simulations (eMicro-Sims) are short screen-based simulations designed to enable scenario/case based interactive, critical thinking, decision making experiences with data analytics in a psychologically safe environment. DLH R.A.P.I.D.'s simulation scenarios advance critical thinking, decision making skills, confidence, and outcomes, all packaged with a strong remediation and data model.

EDUCATION

Proven and effective way to educate, learn and retain subject matter.

TRAINING

Economical training format that is convenient and cost-effective.

COMPLIANCE

Consistent with compliance standards to reduce liability.

READY TO GO

Just add your content or edit any of our templates and you are ready to launch. Publish to industry standard files with a click of a button.

EASY CUSTOMIZATION

Make changes in minutes to your scenario or case. No need to hire a programmer or wait for someone else.

LIBRARY

Choose from our current library to use "as is" or edit and create a version specific to your organization.
