Your Reliable Partner in

Healthcare Technology Management Services

At DLH we understand the importance of a multi-disciplined and synergistic approach to supporting our healthcare customers. We accomplish this by providing seamless team integration, a commitment to a high level of customer service and satisfaction, patient-centered care awareness, and cutting edge medical equipment lifecycle management. From the full spectrum of Initial Outfitting and Transition services to a scaled down specialized biomedical equipment maintenance team, we can tailor our support to meet any customer requirement. DLH's Healthcare Technology Management Team conveys more than 50 plus years of experience and expertise in the Healthcare Technology Management industry.

Performance Areas

- Medical Equipment Life Cycle Management
- Clinical Engineering Management and Consulting
- Program Management Services
- Medical Space and Equipment Planning Service
- Equipment Planning & Procurement
- Medical Equipment Reutilization and Relocation
- Biomedical Maintenance Services
- Medical Device Integration in support of MHS GENESIS (Cerner)
- Final Turnover and Acceptance
- Medical Supply Warehouse Management
- Acquisition Management
- Medical Device Networking and Security
- Medical Systems Connectivity
- Technology Sustainment

Your Mission is Our Mission

Serving National Security & Intelligence, Civilian, and Private Sectors

DLH drives state-of-the-art innovations and solutions across the Civilian, National Security, and Intel communities, as well as the commercial industry. Our professional technical and engineering services deliver next-generation systems engineering, cybersecurity, technology insertion, and best practices-based Enterprise Operations (EOps) management.

Our worldwide top-talent brings proven agility and innovation while maintaining compliance and governance. DLH stabilizes, optimizes, and transforms our clients' environments, realizing their must-have objectives of resilient, reliable, and forward-leaning technical efficiencies.

CMMIDEV/3SM

CMMISVC/3SM

Medical Treatment Facility Initial Outfitting and Transition

DLH's Initial Outfitting & Transition (IO&T) team's largest and latest project supported is the completion of a new state-of-the-art Hospital on Camp Humphreys in South Korea. At a total cost of \$288 million dollars, the new 418,572 square foot hospital provides almost every diagnostic and treatment capability available in the US; to include 68 inpatient beds, an ambulatory care center, numerous outpatient treatment specialties, a level three biosafety lab (BLS3), four-Integrated ORs, six intensive care units (ICUs), pharmacy, MRI, CT, radiological diagnostic capabilities, fluoroscopy, mammography, and a full labor and delivery (L&D) suite. DLH completed a full technical review of each equipment procurement package to ensure they would work according to the technical design drawings and functionality; validating for space, power, water, connectivity, drain, gases, and ventilation, etc. Our BMETs are responsible for installing, inspecting, servicing, and repairing all the medical equipment. Our team completed the final phase of decommissioning the legacy facility by processing disposition of more than 2500 medical systems to the DLA Disposition Services.

The US Army Medical Maintenance Management Directorate (USAMMA-M3D)

DLH has been providing support for more than 5 years to the USAMMA that serves as the Army Surgeon General's central focal point and executive agent for strategic medical logistics programs and initiatives. DLH staff is key in supporting USAMMA's principal skills and technologies focus on the medical logistician's role in life-cycle management, sustaining and modernizing the medical force (Active, Guard, and Reserve), supporting exercises and contingency operations and promoting medical logistics information and knowledge. Our team supports the USAMMA M3D mission to plan, synchronize, and provide Medical Maintenance Operations. DLH support services consists of medical device maintenance, administrative, and professional services that support USAMMA M3D at each of their CONUS maintenance depots in addition to any National Guard units within the 50 United States and territories.

The VHA Office of Healthcare Technology Management (HTM)

DLH's Biomedical Engineering and Professional Services team provide technical and professional support to Biomedical Engineering departments at Department of Veterans Affairs (VA) medical centers, outpatient clinics, VISN offices, and the HTM Program Office to accomplish corrective and planned maintenance, professional Biomedical Engineering services, and project management work of VHA, including the VHA Office of Healthcare Technology Management (HTM) and its customers, to best accomplish VHA's mission, strategic goals, healthcare priorities, and initiatives.

DLH Areas of Expertise

DLH leverages best-of-breed technology and industry best practices to enable our clients to optimize to the forefront of modernization and transformation. We deliver best-fit solutions for today, evolution pathways for the future, and unprecedented resilience in all things – technology, processes, and culture.

Cloud Enablement

DLH drives Cloud Smart adoption and enablement strategies that deliver practical optimization with compliance and security – fully leveraged for your mission, today and tomorrow.

Digital Transformation

Our experts facilitate rapid software delivery through modern scaled Agile frameworks and practices.

Big Data & AI/ML

Our data scientists and analysts help clients gain insights into their big data through data engineering, semantic modeling, predictive analytics, AI/ML, neural networks, deep learning, and data visualization.

DevSecOps

We don't just say we do DevSecOps, we help clients bring Dev and Ops together by implementing cultural change, integrating and left-shifting security, and operationalizing Continuous Integration and Continuous Delivery (CI/CD) pipelines.

Performance Based Logistics

We deliver full cradle-to-grave supply chain management, lifecycle management, and logistics support for IT systems as well as scientific and medical devices.

Cybersecurity Ecosystem

Our cyber solutions enable clients to confidently deploy secure platforms and technologies and protect their most critical data assets. Our Cyber Practice covers the entire security ecosystem – from crypto to policy.

Enterprise-Edge IT Management

We help clients realize greater efficiencies through IT infrastructure support (XaaS, SaaS, IaaS), comprehensive IT managed service delivery and technology automation.

Consulting

We provide the expertise to transform your enterprise environment by optimizing people, processes, and technology while affecting positive, mission-based organizational change.
