Your Trusted Partner in

Performance Based Logistics

DLH utilizes the latest technology to deliver full cradle-to-grave supply chain management, lifecycle management, and logistics support to defense systems worldwide, maximizing warfighter readiness.

Our performance-based logistics solutions incorporate custom designed and developed database architecture to perform quantitative and qualitative predictive analytics across an entire asset-base. Our systems are easily scalable - from a simple program of assets to hundreds of thousands of parts per asset – and our approach is fully integrated. Every action we take is based on a full-understanding of your mission and the needs of your men and women.

Performance Areas

Logistics

- Requisition/CASREP fulfillment - 55% Increase in Fill Rate Percentage
- Full Lifecycle Logistics
- Shipping and Receiving
- Packaging, Handling, Storage and Transportation (PHS&T)
- Inventory Management
- Warehouse Management
- Internal Control Audits (ICA) - Certified Instructor
- Material Readiness Control (MRC)
- Obsolescence Research and SEA collaboration
- Diminishing Manufacturing Sources and Material Shortages (DMSMS)

Maintenance/Engineering

- PBLO and Depot Level Repairs
 - Component and Board Level
 - Digital, Analog and Mechanical repairs
 - All Technicians are J-STD-001/J-7711/1-7721 Micro-Soldering Certified
 - 5S compliant repair facilities
 - Reverse Engineering, ISEA Collaboration, Form Fit Functional (FFF) Engineering
 - Bench Stock Program
 - Calibration Program
 - SCIF system testing and integration

Analytics/Metrics

- Database Design & Management (Custom SQL Db's, CMPRO and CAV)
- Data Analytics/Predictive Analyses
- Financial and Metric based reporting
- Ad-Hoc Relational Databases and Open Database Connectivity (ODBC) interfacing
 - Live, Dynamic Dashboards via Intelink and PowerBI platforms

Acquisition

- Acquisition Contract Actions
 - (P-Cards, SAP's, MAC's, SEWP's, Milstrips, ODC's)
- Future Demand Forecasting (Proactive Support Capability)
- NAVSUP Pricing, modeling, and out-year fiscal analyses

Your Mission is Our Passion

Serving National Security, Intelligence, and Civilian Sectors

DLH drives state-of-the-art innovations and solutions across the Civilian, National Security, and Intel communities. Our professional technical and engineering services deliver next-generation systems engineering, cybersecurity, technology insertion, and best practices-based Enterprise Operations (EOps) management.

Our geographically dispersed top-talent brings proven agility and innovation while maintaining compliance and governance. DLH stabilizes, optimizes, and transforms our clients' environments, realizing their must-have objectives of resilient, reliable, and forward-leaning technical efficiencies.

Performance Based Logistics

Before partnering with DLH, a military customer was beset with fill rates hovering around 80% and 20% min/max sustainment. A daily average of 40 daily pending back orders were left unfulfilled.

DLH worked rapidly to implement a data-first, proactive support model. The improvement was swift and marked. Our innovative solutions, all backed by ISO certified processes and procedures, yielded higher fill rate percentages, sustainable min/max inventory, and zero CASREP and Requisition backorders. The customer program was removed from the TSL (Trouble Systems List) shortly thereafter.

DLH optimizes equipment and logistics systems for maximum readiness at the lowest possible price, ensuring warfighters and decision makers have the tools they need to keep our nation secure.

Our NAVSUP Performance Based Logistics Organic (PBL-O) and Depot Repair of Reparable's expertise supports the following Naval Systems and equipment:

- Ship's Signal Exploitation Equipment (SSEE) (Inc. E, Inc. F and SSEE Mods)
- Naval Modular Automated Communications System (NAVMACS)
- Depot-level support
- TAO Ship Class
- Foreign Military Sales (FMS)
- Expeditionary Fast Transport (EPF)
- URC109 High Frequency Radio (HFR)
- Secure Closed-Circuit Television (SCCTV)
- Consolidated Afloat Networks and Enterprise Services (CANES)
- Naval Tactical Command Support System (NTCSS)
- Distributed Common Ground System-Navy (DCGS-N)
- National Aeronautical Information Processing System (NAIPS)
- Hydra
- Portable Radios Program (PRP): PMW 170, PMW 790
- Shipwide Interior Wireless Communications System (SIWCS)
- Automated Digital Network System (ADNS)
- US Battery.
- Our NAVAIR Performance Based Logistics Organic (PBL-O) supports the following NAVSUP and NAVAIR systems and equipment:
 - PMA-290E
 - EP-3E Spiral 1
 - Spiral 3
 - Son of Banshee
 - Special Projects Aircraft (SPA).

DLH Areas of Expertise

DLH leverages best-of-breed technology and industry best practices to enable our clients to optimize to the forefront of modernization and transformation. Delivering best fit solutions for today, evolution pathways for the future, and unprecedented resilience in all things – technology, processes and culture.

Cloud Enablement

DLH drives Cloud Smart adoption and enablement strategies that deliver practical optimization with compliance and security – fully leveraged for your mission, today and tomorrow.

Digital Transformation

Our experts facilitate rapid software delivery through modern scaled Agile frameworks and practices.

Smart Data & AI/ML

Our data scientists and analysts help clients gain insights into their smart data through data engineering, semantic modeling, predictive analytics, AI/ML, neural networks, deep learning, and data visualization.

DevSecOps

We don't just say we do DevSecOps, we help clients bring Dev and Ops together by implementing cultural change, integrating and left-shifting security, and operationalizing Continuous Integration and Continuous Delivery (CI/CD) pipelines.

Performance Based Logistics

We deliver full cradle-to-grave supply chain management, lifecycle management, and logistics support for IT systems as well as scientific and medical devices.

Cybersecurity Ecosystem

Our cyber solutions enable clients to confidently deploy secure platforms and technologies and protect their most critical data assets. Our Cyber Practice covers the entire security ecosystem – from crypto to policy.

Enterprise-Edge IT Management

We help clients realize greater efficiencies through IT infrastructure support (XaaS, SaaS, IaaS), comprehensive IT managed service delivery and technology automation.

Consulting

We provide the expertise to transform your enterprise environment by optimizing people, processes, and technology while affecting positive, mission-based organizational change.
